

PHSA Laboratories is a premier provider of laboratory medicine and pathology services in British Columbia supporting the Agencies of PHSA, community patients, other BC hospitals and out-of-province facilities. The dedicated staff of PHSA Laboratories provide acute diagnostic testing and interpretation for our physicians as well as unique and specialized testing for clients who recognize our expertise in specialty areas. Together with our clients, our goal is a partnership that will provide superior quality diagnostic, prevention and treatment information that will improve patient care today and in the future.

The Provincial Health Services Authority (PHSA) plans, manages and evaluates selected specialty and province-wide health care services across BC, working with the five geographic health authorities to deliver province-wide solutions that improve the health of British Columbians. *PHSA embodies values that reflect a commitment to excellence. These include: Patients first • Best value • Results matter • Improvements through knowledge • Open to possibilities.*

Laboratory Information Systems (LIS) Analyst

PHSA Laboratories

Regular Full-time

BC Cancer Agency - Vancouver, British Columbia

A self-motivated, enthusiastic individual, you'll provide technical support to laboratory management and end-users with training and operational support regarding LIS errors and problems. Working in collaboration with other PHSA departments and MSP as the representative for the PHSA Medical Laboratories, you'll handle issues such as system testing, local development of databases and system applications and maintenance of quality reports and ad hoc queries as well as make recommendations for process and systems improvements. In addition, you'll also develop and utilize test scripts to perform LIS functionality and interface testing, design and develop ad hoc reports for both medical and laboratory business purposes, and provide input to laboratory management regarding LIS capital and operational budget requirement with assigned area.

You're a Graduate from a recognized program in Medical Laboratory Technology, have current registration with the Canadian Society of Medical Laboratory Science (CSMLS), and hold a Diploma in Information Technology. You also possess three (3) years' recent experience in laboratory information systems or an equivalent combination of education, training and experience.

You bring a proven ability to design and use database and spreadsheet programs on a microcomputer, can communicate effectively in English, both verbally and in writing, have a working knowledge of Standard Query Language SQL and possess exemplary multi-tasking capabilities.

If you are enthusiastic and passionate about working in a stimulating environment that fosters life long learning in a Laboratory that is clinical, academic and research-based, then consider this exceptional role with the PHSA Laboratories.

We invite you to apply by clicking the "**Apply Online Now**" button where you can register for the first time or enter your Username and Password in order to re-access your profile on our system.

Applications will be accepted until the position is filled with interviews beginning immediately.

For more information on all that the PHSA has to offer, please visit: <http://careers.phsa.ca>

The PHSA is committed to employment equity and hires on the basis of merit. We encourage applications from all qualified individuals, including women, Aboriginal peoples, persons with disabilities and members of visible minorities.
