Credit Card: Online registration www.bcsls.net – education – Telehealth

Cash or Cheque: Register with the Site Coordinator at your site

Where:

- Broadcast to over 45 sites across BC. To see which sites are participating this month, check the site list on the website. www.bcsls.net – education
- See it live in Vancouver at Women's and Children's Hospital. Limited seating.

This presentation will discuss the role of POCT in the management of chronic disease and its role within the context of patient centric care as provided by community based allied health care workers.

It is clear that newer more efficient cost saving strategies will be needed to meet this challenge. What might these strategies look like? Will the laboratory be involved? If the laboratory is involved, what will be its role?

As the population in Canada ages, the costs of managing chronic disease (diabetes, cardiovascular, kidney disease) continue to rise and there is no end in sight. Governments in their struggle to control these costs are emphasizing prevention and patient centric health care as potential solutions to the problem.
