

PHSA Laboratories provides laboratory medicine and pathology services to the Agencies of the PHSA. The vision of the PHSA Laboratories is to be the reference laboratory of choice for tertiary and quaternary hospitals and community healthcare systems, as the most responsive source of quality information and knowledge. Clients of PHSA Laboratories can select elements from diverse laboratory and service areas to create customized relationships that meet the needs of their unique communities. Together, PHSA Laboratories and its clients will improve patient care today and in the future.

The **Provincial Health Services Authority (PHSA)** plans, manages and evaluates selected specialty and province-wide health care services across BC, working with the five geographic health authorities to deliver province-wide solutions that improve the health of British Columbians. PHSA embodies values that reflect a commitment to excellence. These include: *Patients first • Best value • Results matter • Improvements through knowledge • Open to possibilities.*

Laboratory Technologists

Transfusion Medicine (1) & Clinical Biochemistry (3)

Labs at BC Children's Hospital & BC Women's Hospital and Health Centre

Regular Full-time

Vancouver, BC

We have exceptional opportunities for laboratory professionals to join our team on a full-time basis. These are specialty-focused roles within PHSA Laboratories and include opportunities in areas such as clinical chemistry and transfusion medicine. The Agencies served are BC Children's Hospital and the BC Women's Hospital & Health Centre.

Reporting to a Chief Technologist, you will participate in day-to-day routine and specialized laboratory testing activities using standard protocols and accepted practices to qualitatively and quantitatively determine the significance of the results. You will also participate in quality assurance programs and provide insight and support for the development and maintenance of standard operating procedures (SOPs).

In addition to graduation from a recognized program in Medical Laboratory Technology, you bring recent related experience as a Registered Technologist (RT). You must have current registration with the Canadian Society of Medical Laboratory Science (CSMLS) in order to be considered qualified. An equivalent combination of education, training and experience may also be considered. A demonstrated attention to detail and strong organizational skills are a must, as are strong interpersonal and communication skills, and a willingness to learn. Self-motivated with the ability to work well independently, you also thrive in a team environment. If you are enthusiastic and passionate about working in an environment that fosters life long learning, and a setting that is clinical, academic and research based, then consider these exceptional roles with the PHSA Laboratories.

We invite you to apply online for this position at <http://careers.phsa.ca>

Applications will be accepted until the position has been filled.
