

Bio: Dr. Schubert

- ✧ Dr. Schubert received his PhD in biochemistry, molecular biology and microbiology at the University of Erlangen, Germany. With two subsequent postdoctoral research appointments at the Biomedical Research Centre at UBC supported by a Michael Smith Foundation of Health Research award and the Canadian Institutes of Health Research/Heart and Stroke Foundation of Canada he gained scientific training in cell biology and proteomics, respectively. He is a Clinical Associate Professor in the Department of Pathology and Laboratory Medicine, UBC and a Research Associate with Canadian Blood Services.
- ✧ His interest is Blood Research including the biochemistry of blood components [by unraveling signal transduction pathways] and the application of proteomics to transfusion medicine / blood banking.
- ✧ He has written many articles on transfusion medicine
