

Bio: Dr. Titus Wong

☞ Titus Wong is a Medical Microbiologist in the division of medical microbiology and infection control at Vancouver General Hospital. After completing an undergraduate degree in pharmaceutical sciences, he completed medicine and residency training (Medical Microbiology) at the University of British Columbia. He is currently pursuing a Masters of Health Science degree in clinical epidemiology through the UBC School of Population and Public Health. Current research interests include prevention and control of hospital-acquired infections and practical applications of photo-medicine for infection prevention. Titus is a member of the Clinical Microbiology Proficiency Testing (CMPT) bacteriology committee. In addition to his clinical responsibilities, he is heavily involved with resident and medical student education as a clinical instructor with UBC department of pathology (faculty of medicine), course director for Pathology 722, and assistant program director for the MM residency program.
